A leaflet on how to make a complaint or compliment is given to each service user, or any person acting on their behalf.

Praxis Care endeavours to locally resolve any issue/s raised in the first instance. However, Praxis Care recognises that, in some circumstances, complaints require further investigation. Praxis Care has a nominated Complaints Officer who can be contacted in this instance. Service users are also provided with the contact details of the Statutory Agency and Regulatory and Commissioning bodies whom they can contact if satisfaction is not reached. Advice on the process of making a complaint is also available via the organisation's website: www.praxiscare.org.uk

- Ensure that the health, safety and welfare of service users and staff are promoted and protected.

# **10. INCIDENTS & ACCIDENTS**

## 11. RESTRICTIVE INTERVENTIONS & DEPRIVATIONS OF LIBERTY

Praxis Care is committed to ensuring that the rights of each person are protected, including the right to liberty. However, there may be some occasions when, in the best interests of a person lacking capacity and in order to prevent them suffering harm, it is necessary to put in place interventions which are restrictive, including depriving someone of their liberty.

Where the use of restrictive interventions are unavoidable they are used in a transparent, legal and ethical manner, are the least restrictive option available, and are used for the shortest time possible. Any restrictive intervention is agreed in advance with the appropriate statutory services.

Actions such as a deprivation of liberty are taken as a last report, and will only be taken in line with the relevant legal framework, ensuring that all safeguards and authorisations are in place.

All staff involved in the care of an individual requiring restrictive interventions will receive appropriate training in restrictive interventions.

# **12. MEDICATION MANAGEMENT**

Praxis Care has a comprehensive policy which governs the management of medication across the organisation. This policy aims to:

- Promote safe practices in managing medication.
- Set out the practical guidelines and define the principles for safe and effective systems including the arrangements required regarding receipt, storage, administration, disposal, and documentation of medicines.
- Operate on the principle of an assessment to establish the extent of the service user's ability to safely take medication. Following this assessment, a plan will be constructed which identifies the level of support required by the service user. Praxis Care encourages service users to self-manage their medication and will provide support and assistance.

# 13. COVID-19

Praxis Care is committed to the safety of those who use its services, its staff and volunteers, and to those members of the public with whom it comes in contact.
